

This is a list of words compiled to use along with Understanding Fractions. There is a Word Bank created for each topic that can be selected from the Main Menu. Remember that each topic contains a wide variety of information that extends across different grade levels. The words that are recommended to know are words that students will be presented with as they complete the lessons. These words could be reviewed before starting a lesson, put on a word wall, included in a math dictionary or whatever else you see fit. The words students input are the words that students need to input within the software, spelled correctly, to complete a lesson. This could be used as support for students that struggle with language, or for building a word wall.

TOPIC 1: The Meaning of Fractions

Words Students Input	Words For Your Word Wall <i>(This is a list of words that students should have prior knowledge of OR they will know by the end of the topic)</i>
sixth third half same	numerator denominator equal out of one half one third one sixth one quarter two fifths three eighths seven tenths one whole fraction halves thirds quarters fifths sixths eighths opposite greater than (>) less than (<) hexagon trapezoid rhombus triangle rectangle squares tangram estimation
