

This is a list of words compiled to use along with Understanding Fractions. There is a Word Bank created for each topic that can be selected from the Main Menu. Remember that each topic contains a wide variety of information that extends across different grade levels. The words that are recommended to know are words that students will be presented with as they complete the lessons. These words could be reviewed before starting a lesson, put on a word wall, included in a math dictionary or whatever else you see fit. The words students input are the words that students need to input within the software, spelled correctly, to complete a lesson. This could be used as support for students that struggle with language, or for building a word wall.

### TOPIC 3: Equivalent Fractions

<b>Words Students Input</b>	<b>Words For Your Word Wall</b> <i>(This is a list of words that students should have prior knowledge of OR they will know by the end of the topic)</i>
equivalent equal divide same multiply half greater	equivalent out of equal parts fraction square triangle hexagon whole sixths trapezoid fourths thirds same ninths fifty-fourths denominator numerator groups of less than (<) greater than (>) horizontal equal multiply divide division greatest common factor simplest form lowest terms product common factor
