

This is a list of words compiled to use along with Understanding Graphing. There is a Word Bank created for each topic that can be selected from the Main Menu. Remember that each topic contains a wide variety of information that extends across different grade levels. The words that are recommended to know are words that students will be presented with as they complete the lessons. These words could be reviewed before starting a lesson, put on a word wall, included in a math dictionary or whatever else you see fit. The words students input are the words that students need to input within the software, spelled correctly, to complete a lesson. This could be used as support for students that struggle with language, or for building a word wall.

TOPIC 9: Quadratic Functions

Words Students Input	Words For Your Word Wall <i>(This is a list of words that students should have prior knowledge of OR they will know by the end of the topic)</i>
lowest highest minimum maximum vertex narrow same subtract quadratic parabola greater than 0 up down positive negative less than 0 number price straight	quadratic values parabola vertex axis of symmetry concave up concave down symmetric x-axis x- intercepts general quadratic function constant term increases completing the square quadratic function quadratic equation solutions of quadratic functions intercepts of quadratic functions
